Hi Jennifer,

The evacuation route for the North Office Building occupants was decided years ago by the H&S Committee. It is the safest route away from potential down powerlines and also the quickest route to high ground in the event of a seiche.

Eunice

Hi Eunice,

I just wanted to confirm that the evacuation route for the North office building is a safe and reasonable route. Some of us wear sandals and there isn't really a maintained path up along the fence. It also seems counter intuitive to be trapped on the other side of the fence line.

-Jennifer

Lab Team,

I wanted to reach out to you to see if the latest graphics from Kevin in regards to the Evacuation card for your facility was satisfactory? If you could look over it one last time, the front graphics, the back side and the points of contact, the accuracy of the numbers listed and lastly the instructions. If you could reach back out to me before Thursday the 27<sup>th</sup>, as I would like to update Peter on the status and finally get these out for printing.

Best Regards,

Slightly tweaked the WOO card, and gave the lab its two evac locations. Let me know if the wording or indicators need adjustments.

I also just noticed that the Lab has a couple numbers with a 9 prefix to dial out, I suppose we should be consistent on that? Does 9 apply for all locations/numbers?

**Subject:** Re: Evac Cards for Ops Offices

Hi Devon,

MEL has 2 different evacuation sites depending on if there is a fire or an earthquake. The card shows the evacuation location in the event of a fire but in the event of an earthquake, staff (b) (2)

All,

Here is our attempt at creating the front side of the Evacuation Cards for the Ops Offices, minus AOO and HPO. We do not have enough information to go off of to create one for AOO or HPO quite yet. Marla and David E., could you help Kevin Brown and I out with more detail?

WOO is also different, as they aren't evacuating very far from the building. Are we misreading the OEP from WOO? Alison, could you help Kevin and I out on that part? Maybe we can highlight in red which portion of the huge building you're in?

Please send us feedback as soon as possible, so that we can get these out to the vendor quickly.

- (I have attached copies of the evacuation cards that we had made for the Seattle HQ office, **please send us the contact information that you would like to have put on the back side as well**)

Best Regards,

Devon Scarey
